In this section we compare Form/ayout with Table/ayout, H!plicit/ayout, Grid1ag/ayout and Spring/ayout I all of which are fle!ible and powerful.

The Forms framework has been designed to supercede Table/ayout and it can often replace Grid1ag/ayout and Spring/ayout when building form%oriented panels. H!plicit/ayout offers more fle!ib

I'"e found that no"ice and e!perienced de"elopers can work well with the Table⁄ayout. The grid%based layout model seems to be easy to learn and easy to work with. #nd it seems to me that Table⁄ayout works well with grid%oriented "isual form edi ied
